Dr. Tom Licence is Senior Lecturer in History at the University of East Anglia in England. He is the author of 'What the Victorians Threw Away' and the searchable database of artefacts recovered from historic rubbish dumps: www.wtvta.com. His archaeological work has featured on BBC's Inside Out, the BBC World Service, US National Public Radio, The Atlantic's City Lab and in various other media outlets nationally and globally.

'A History of Garbage: The Origins of a Throwaway Society' - Humans, since pre-historic times, have generated waste, but it was the Victorians (1837-1901) who first generated garbage in large quantities. The arrival, in the late nineteenth century, of brands and packaged products led to the creation of a new waste stream consisting of glass, ceramic, metal and paper packaging. Disposability was a factor in its design, and soon the Victorians learned to discard not only things that were broken, but also empty containers. Such were the origins of our throwaway society.

In this lecture, Dr. Licence uses items excavated from rubbish dumps to show how our throwaway habits developed. He explores Victorian ideas about re-use and re-cycling, and links emerging patterns of waste-creation to the growth of western consumerism.

The Association of British Scholars (ABS), Trivandrum Chapter

The Association of British Scholars (ABS) is a national forum to facilitate the networking of Indians who have studied or trained in the UK. ABS India aims to strengthen the Indo-UK relationship by harnessing the resources, expertise and potential of every ABS chapter through networking, sharing information and hosting social, cultural and intellectual activities. More information and membership details from www. britishcouncil.in/programmes/uk-alumni/ join-association-british-scholars-abs.

Kerala Council for Historical Research

KCHR. trans-disciplinary social а science research centre located at Thiruvananthapuram is an autonomous institution affiliated to the University of Kerala and funded by the Higher Education Department, Government of Kerala. KCHR has been conducting archaeological excavations at Pattanam in Ernakulam District since 2007. The excavation has captured global academic attention and its findings have potential to rewrite the maritime history of the Old World. For more information, please visit: www.kchr.ac.in
